

# Pilot Vision™

## Headset Mounted Augmented Reality Display

### AR Augmented Reality

High resolution, wide field of view see-through prism eyepiece provides overlays for ground speed, altitude, attitude, terrain information, etc.

### Situational Awareness

Provides high brightness symbology over a 62° field of view with minimal obscuration

### iFly GPS

Adventure Pilot's EFB app with intuitive flight planning and navigation, and the advanced features pilots want

### Flexibility

Mounts to commercial communications headset, rotates up when not in use

### Applications

Designed for pilots in commercial and civilian aircraft, as well as military mobility pilots

### Control Unit

Self-contained system with no requirement to tie into aircraft electronics

## Vision Products, LLC

We are a privately held small business and a pioneer in the development and deployment of innovative head- and body-worn solutions for commercial and government customers. We specialize in the design, development and manufacture of state-of-the-art high-resolution wide field-of-view head-worn displays and vision systems. Our products and technologies include augmented, virtual and mixed reality systems; digital night vision products; and the development of systems for medical applications.
